General Manager  
Convergent Nonprofit Solutions

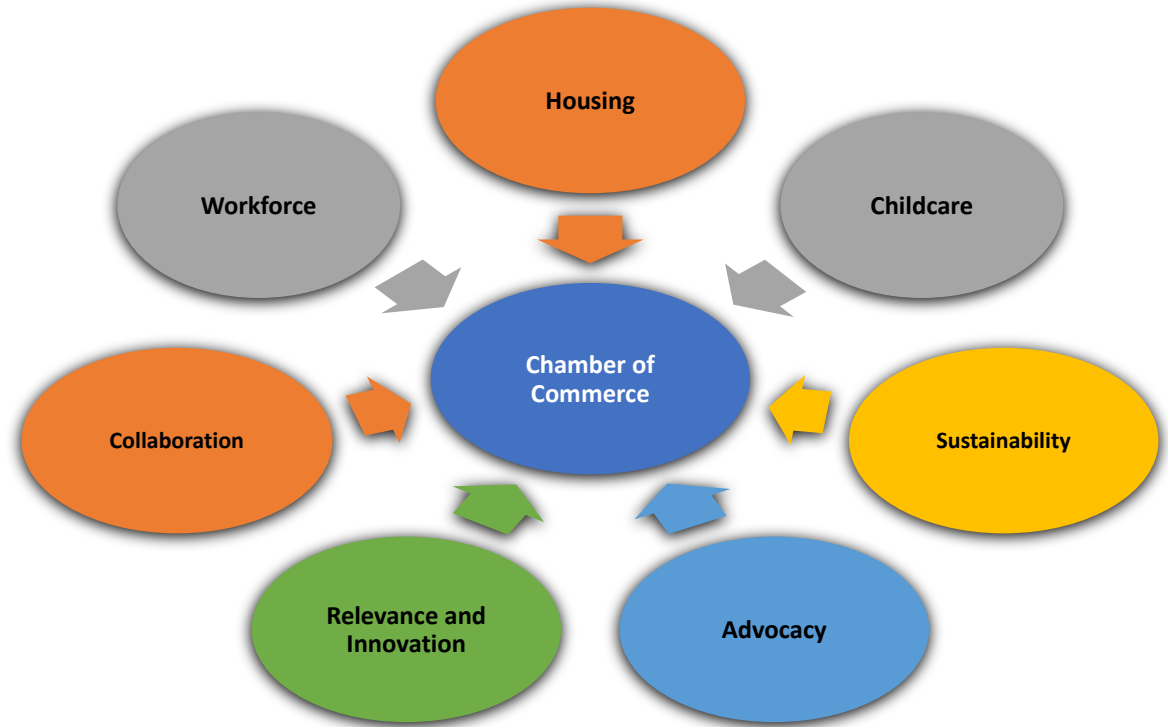

Chris Madrid  
Marketing Strategy  
Convergent Nonprofit Solutions

# Asking Rights™

Earning the right to ask for big dollars.

Hot Issues:  
Challenges  
Facing  
Chambers of  
Commerce

# Today's Panel

Mary Beth Brownlee  
Director  
One Valdosta-Lowndes

Deb Page  
President  
The Institute for  
Performance Improvement

Steve Stevens  
Senior Project Director  
Convergent Nonprofit Solutions

Hurdles:

*Why*

*Collaborations*

*Fail*

Siloed  
Organizations

Fear of Sharing  
Funding

Desire for Credit

Absence of Trust

Lack of Buy-in

Facilitators Lack  
Skills & Tools

Groupthink

Poor  
Relationships

Not Enough  
Conversations

Characteristics  
and Critical  
Steps in  
Creating a  
Successful  
Collaboration

**Win Win**

**Purpose  
Alignment**

**Trust**

**Sharing  
Values**

**Clear  
Responsibility**

**Open  
Communication**

Identifying  
the Issue:  
*Selecting  
Big Rocks*

## Test of Significance & Relevance

- *Does this fit our mission?*
- *Who wants this issue (members, allies, outsiders asking us)?*
- *Are we the only organization who can lead this issue in this community?*
- *Can we be a supporter rather than a leader?*
- *Can we affect this issue and/or make a difference in its outcome?*
- *Who will this help?*
- *What will the issue cost the organization to support or oppose it?*
- *Is this the right issue for us and will it cost us political capital?*

Identifying  
the Issue:  
*Selecting  
Big Rocks*

- Saying “No” to the wrong thing, allows you to say “YES” to more impactful collaborative work.
  - Consider timing
  - Consider root causes and causal factors
  - Understand existing capacity and opportunity costs
- Ignite College & Career Academy, Americus, GA.

# Adaptive Process

- Trusted convenor with neutral facilitation is critical.
- Beware Pet Rocks and Shiny Things.
- Proven processes and tools to guide exploration, participation, and solution building.

# Adaptive Process

- Addressing Gun Violence Sumter County, GA
  - Clarifying it was *everyone's* issue.
  - Create buy-in vs. finger pointing
  - Shared solutions to achieve mutual benefit ensures efficacy and accountability.

Adaptive

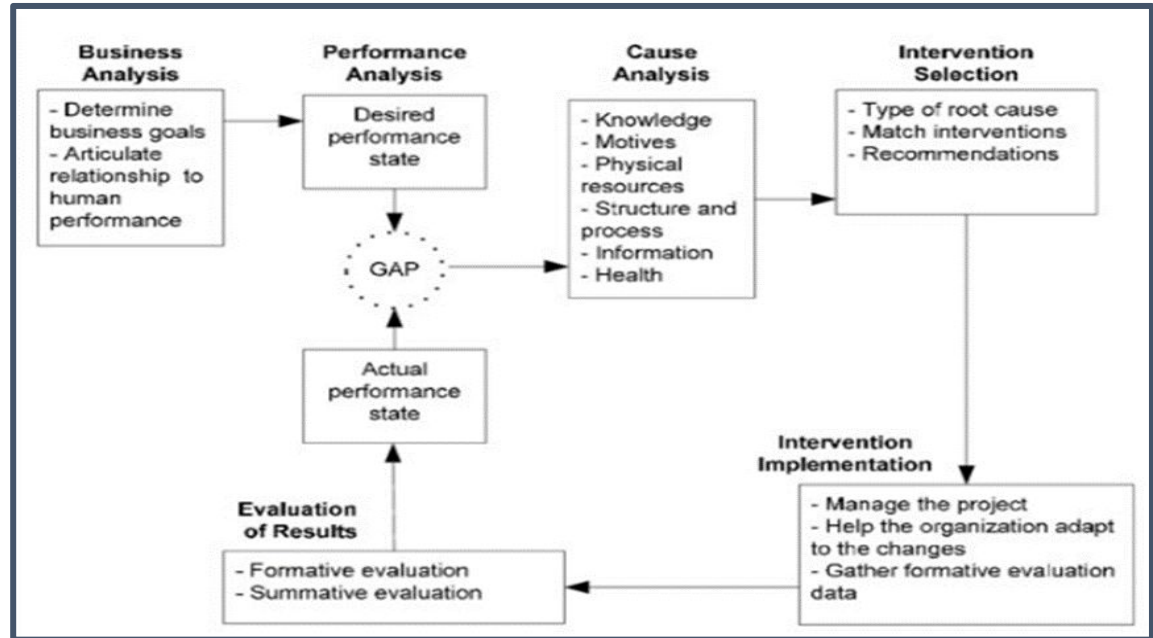

Process:

*Using a  
Model to*

*Guide a  
Collaborative*

*Effort*

## Human Performance Improvement Model

Adaptive  
Process:  
*Performance*  
*Factors*  
*Analysis*

## Performance Factors Analysis

| Marketplace                                                                                                                             | Workplace                                                                                                                                                    | Work                                                                                          | Workers                     |
|-----------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|-----------------------------|
| <i>What factors in the can or do impact the success of people, organizations, and collaborators to achieve the goals of the effort?</i> |                                                                                                                                                              |                                                                                               |                             |
| Demographic, economic, political, technological, social, etc.                                                                           | Culture, climate, complexity, physical plant, schedules, technology, tools, supervision, leadership, team dynamics, feedback, development, recognition, etc. | Complexity, difficulty, design, autonomy, consequences, variety, significance, workload, etc. | Will, skill, and readiness. |
| <i>Who has the ability, responsibility, or accountability to impact these factors to help people and organizations succeed?</i>         |                                                                                                                                                              |                                                                                               |                             |

# Neutral Facilitation

- Neutral Facilitation's Value Proposition:
  - Neutrality to guide success for ALL!
  - Objectivity enables placement of guard rails.
  - Focus on the issue, rather than people around the table.

# Neutral Facilitation

- Opioid Crisis in Northern KY
  - Varied stakeholders shared adverse impact
  - None with clear *direct* avenue to change the issue individually

Tools &

Tactics:

*Logic Models*

## Logic Model for Community Response to Opioid Epidemic

| Inputs                                                                                                                                                                                                                                                                                                                                                           | Activities (High-Level)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Outputs                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Outcomes Short-Term                                                                                                                                                                                                                                                                                                                        | Outcomes Mid-Term                                                                                                                                                                                                                                                                          | Outcomes Long-Term                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

# Mutual Benefit

- Aligning regional interests for transportation infrastructure investment
  - Metro area economic engine that rural areas rely on.
  - Fixed “pie” of funding that has to be sliced and handed out.
  - Can’t ever do *everything*, but what is best case for *everyone*.

# Tools & Tactics: *Logic Models*

## Logic Model

- **Inputs:** Resources needed or applied to the effort
- **Activities:** Specific actions or services needed to achieve the goals of the effort.
- **Outputs:** Tangible deliverables, products, or services which can be counted and measured.
- **Outcomes:** Short-term, intermediate, and long-term changes or benefits resulting from the efforts
- **Process Evaluation:** Monitoring, measuring, and assessing completion of activities and achievement of deliverables and outputs.
- **Outcome Evaluation:** Monitoring, measuring, and assessing and achievement of targeted outcomes and goals.

# Clarity on Decisions and Action

- Expanding Broadband in Rural Georgia
  - Bold approach to the a major issue
  - Leveraged data informed decision making
  - Direct conversations with responsible parties and stakeholders
  - Innovation and clarity drove action

Tools &  
Tactics:  
*RASGO*  
Chart

**RASGO Chart**

| Responsible | Accountable | Supporting | Guiding | Observing |
|-------------|-------------|------------|---------|-----------|
|             |             |            |         |           |

# Achieving Effective Collaboration

*“The difference  
between working  
together and  
collaboration is  
shared goals.”*

*- Dr. Jane Dutton*

- Select and Communicate “Big Rocks.”
- Use an Adaptive Process - *What*.
- Provide Skilled Neutral Facilitation - *How*.
- Explore and Identify Mutual Benefits.
- Achieve Clarity on Actions, Objectives, and Outcomes.

# Tools & Tactics

- Test of Significance and Relevance
- RASGO Chart
- Logic Model
- Performance Factors Analysis
- Certified Performance Improvement Facilitators
